What Have We Learnt?

Today, we've talked about the NSPCC online assembly we'll be watching soon.

We've learnt about children's rights and discussed ones we feel are most important to us.

In the online assembly, we'll look more at these rights. You'll get to meet and find out more about Buddy too!

I have the right to be safe.

I have the right to speak out and be heard.

NSPCC
Speak out. Stay safe.

Raising Aspirations - Careers

Wendy came into school to talk to Year 3 about her role as a fitness instructor.

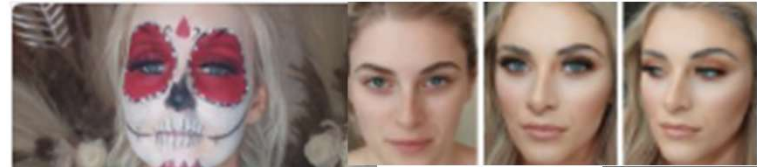

Mr Sayce came into school with his bird of prey to talk to Year 4 about his role as a pest controller.

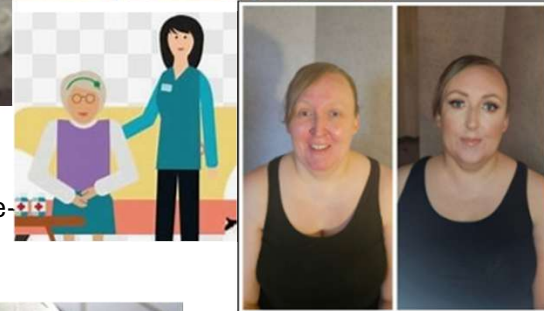

Since launching the project children's aspirations have significantly broadened. Meeting individuals with different life experiences and occupations has introduced them to possibilities they may not have otherwise considered.

It has encouraged our children to foster curiosity, ambition, and confidence by showing them real-world examples of success in various fields. Meeting people with different careers can challenge stereotypes and opens doors to new opportunities.

Mrs Garity came into school to talk to Year 6 about her role as a make-up artist and a carer.

Chris from Lovell construction came to speak to Year 6 to show them all aspects and vocations available on a construction site- linking in maths knowledge.

Veolia UK | Waste, Water & Energy Services

Pete from Veolia came to speak to Year 5 about being a service engineer, he explained how his role links to Science and Maths.
